## NimCache Ultra

Say goodbye to slow-loading websites and unresponsive pages, and say hello to uninterrupted user experiences, with NimCache Ultra by Nimbus.

**NimCache Ultra** is the ultimate solution for optimising website performance. It ensures your WordPress websites are accessible and responsive, even during periods of increased traffic or unexpected surges.

Experience lightning-fast page load times and reduced latency of page load speeds, thanks to **NimCache Ultra**'s cutting-edge technology.

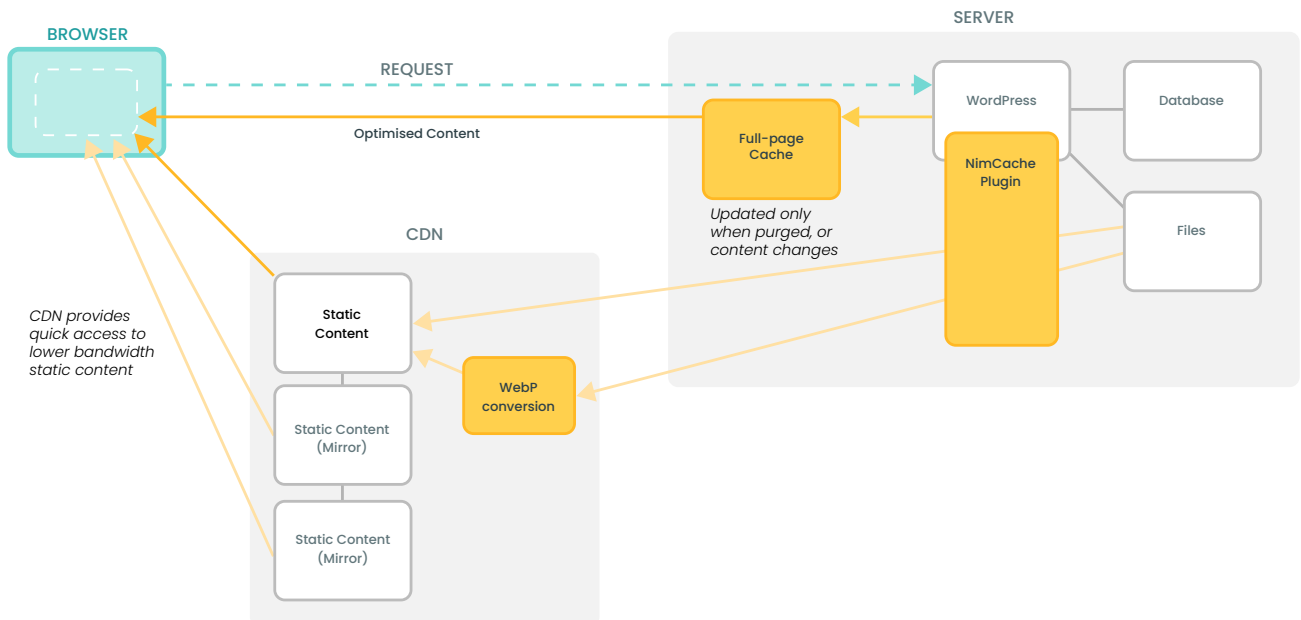

Add **NimCache Ultra** to your web hosting armoury and give your visitors seamless browsing experiences that keep them on your sites for longer.

## What is NimCache Ultra for?

**NimCache Ultra** is the perfect tool for websites where performance and user experience matter – those with high traffic, global traffic, and traffic spikes; e-commerce sites, and sites optimised for search engines.

## Good for the planet.

Deploying **NimCache Ultra** is not just about enhancing performance – it also helps protect the environment. By reducing the number of requests made to the origin server, and reducing the amount of database queries and server processing required, our caching tool lightens the server load, using less energy and creating a greener process.

# How does it work?

**NimCache Ultra** dramatically improves website speeds by up to 26% – with a typical webpage loading in under one second. It combines advanced **caching** technology with a **Content Delivery Network (CDN)** to effortlessly revolutionise website performance.

By leveraging our CDN, it offloads static content such as images, ensuring fast and reliable access globally. It also serves cached pages directly, reducing server load and improving page load times.

**Brace yourself for faster, more responsive websites.**

# And the best part: **NimCache Ultra can help boost your income.**

Boost your income while providing your clients with lightning-fast websites and uninterrupted user experience.

How? By adding **NimCache Ultra** to your retainer packages or selling it to your clients as a standalone add-on to your monthly web hosting fee.

Take advantage of this opportunity to increase your monthly revenue with our cutting-edge caching and CDN solution. We're here to help, so let's talk about **NimCache Ultra** today.

# Advanced performance features.

---

## 1 Content delivery network (CDN).

Deliver lightning-fast images to users worldwide, with our global server network. Reduce latency, enhance website performance, and improve user experience through localised image caching and distribution.

### **As a result, you can:**

- Accelerate image delivery on your clients' websites
- Ensure swift image delivery regardless of user location
- Decrease server load and enhance page load speeds
- Be environmentally friendly with fewer server requests

## 2 Turbo-charged caching.

Store both static and dynamic content and pages, reducing server load and delivering them to users at turbo-charged speeds. With local content storage, retrieval and delivery is lightning quick. Scale effortlessly as cached content can be delivered to multiple users simultaneously, without repetitive processing.

### **As a result, you can:**

- Deliver frequently visited pages with super-fast speed
- Accelerate content delivery time
- Minimise latency for users, enhancing their experience
- Boost marketing performance by improving load speeds

## 3

### WebP image transformation.

Experience the beauty of WebP images: smaller file sizes, without compromising quality. With advanced compression techniques, WebP achieves significantly smaller sizes than JPEG and PNG formats. Enjoy faster-loading websites while preserving image integrity.

#### **As a result, you can:**

- Compress images files while preserving image quality
- Experience faster website loading times
- Reduce bandwidth usage
- Enjoy seamless compatibility across all modern browsers

## 4

### Faster content purging.

With a global purge time of just 150 milliseconds, we swiftly remove stale content across the network. Our advanced features mean you can rest assured your content can be purged from the cache worldwide in a flash. Embrace the power of speed and reliability with content purging.

#### **As a result, you can:**

- Cache content at the edge while ensuring easy purging
- Swiftly remove content from the global cache as needed
- Maintain control of managing content stored on your server
- Continually refresh, remove, and optimise your content

# Marketing performance benefits for your clients.

By leveraging caching technology and offloading traffic to our CDN, your clients' websites can experience lightning-fast performance and effectively manage higher volumes of visitors during peak periods, such as product launches or promotional campaigns.

These performance enhancements improve customer satisfaction and loyalty while positively impacting user engagement. See reduced bounce rates, higher conversion rates, and amplified search engine rankings. What's not to like?

## Accelerate towards superior web performance today.

Don't let slow loading times hold you back. Upgrade to **NimCache Ultra** and give your websites the boost they deserve.
